Summary

Enthusiastic developer experienced in frontend technologies like React.js, React Native,, Expo Tailwind CSS, NativeWind, Redux, and GSAP, and proficient in backend technologies such as Node.js, Express.js, MongoDB,Firebase. Passionate about creating dynamic, user-friendly web and cross-platform mobile applications.

Education

National Institute of Technology, Uttarakhand   Expected May 2026
Bachelor of Technology in Electronics and Communication Engineering   *Srinagar, Uttarakhand*

Projects

Focus - A Productivity Mobile Launcher | *React Native* ▶ **Play Store**   ○ **GitHub**
- Created native Kotlin modules to retrieve installed app information and manage launcher functionalities.
- Implemented phone lock to restrict usage for focused work.
- Built a customizable app drawer (with/without icons) for a clean UI.
- Designed a minimalist home screen for a distraction-free experience.

AI-Powered Movie Search Application (Live Link)   (APK Link)   ○ **GitHub (Web)** ○ **GitHub (App)**
- Built a responsive website with React.js and vanilla CSS for a mobile-friendly UI.
- Developed mobile app with React Native, Expo, and NativeWind for cross-platform support.
- Integrated TMDB API for movie data and OpenAI API for smart search.
- Used Redux for efficient state management and smooth data handling.
- Implemented Firebase Authentication for secure user login.

Social Media Website using React.js (Live Link)   ○ **GitHub**
- Dynamic and interactive UI using React.js.
- Efficient state management using Redux.
- Secure authentication with Firebase Auth and Google OAuth.
- Efficient media storage and retrieval with Firebase Storage.
- Real-time data updates with Firebase Realtime Database.

Modern Agency Landing Page | *HTML, CSS, JavaScript* **(Live Link)**   ○ **GitHub**
- Smooth, engaging, and performance-optimized animations using GSAP
- Unique scrolling effects and interactions with Locomotive Scroll.
- Seamless experience across all devices with responsive design
- Clean, contemporary design with modern aesthetics.

Technical Skills

Languages: JavaScript, Java
Frontend Technologies: React.js, React Native, Expo, Redux, React Router, Expo Router, Tailwind CSS, NativeWind.
Backend Technology: Node.js, Express.js, MongoDB, Postman, Firebase, Appwrite .

Certifications

- **Frontend Domination** Sheryians Coding School **(Link)**

Declaration

I confirm that the information provided in this resume is accurate and complete to the best of my knowledge.
